EXAMINER'S AMENDMENT

An examiner's amendment to correct an obvious error in the application appears below. Should the change be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: In line 5 of claim 1, "movable" has been changed to - - movably - -.

Claims 1-14 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to show a seating device that may be used for exercise or therapy including a lock assembly mounted to the primary frame and including an operating handle mounted adjacent one of the side frame components and a lock bar moveable relative to and beneath the seat, a linkage for connecting the operating handle to the lock bar, whereby when the operating handle is in a first position the lock bar engages the seat frame to prevent relative movement between the seating unit and the primary frame, and when the operating handle is in a second position, the lock bar is

disengaged from the seating unit whereby the seating unit is movable relative to the primary frame, in combination with other specifically claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The corrected drawings filed June 22, 2005 have been approved.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lumley et al (5746478) shows a seating assembly with a means for locking a seat portion against movement relative to a frame portion.
